

# GREYS

Taking inspiration from earthy stone hues can help your home blend in with the local surroundings. With a wide variety of shades, create a classic look that will stand the test of time.

# REDS

Traditional red roofing is an Australian iconic element. To create a traditional feel you can't go past these familiar earthy reds and terracottas for a timeless appeal. There are so many options when creating a colour scheme with a red roof. As these colours are earthy you can use natural greys, greiges, greens and stone colours.

## NATURALS

Nature's tones can really create a timeless appeal and darker hues can modernise the look. Whether you want your home to stand out or blend in, we have a colour to suit your needs.

## GREENS

As greens are drawn from natural surroundings, they are a perfect colour to use on the exterior of homes. Greens range from light grey green shades to darker olive tones. Greens are so versatile and work well with so many colours due to their earthy and muted undertones. Greens can provide an organic setting for a roof to camouflage in nature's bush canopy.
